### HERCULES-M27 / H27 PUMPS

The HERCULES-M27 / H27 is a high pressure and high volume Water transfer Pump with a 3" outlet. It has a capability to deliver a massive 27L/sec or a high 70m head. This pump has a reputation as a serious water transfer pump. This pump can be direct coupled or be belt driven with an engine, electric or pneumatic or hydraulic motor. The casing is made as Standard from marine grade aluminum and with a solid FG 200 grade impeller. It is also available in a zinc free bronze construction. All suction and discharge ports are made from a sturdy zinc free bronze / SS304 (CF-8 Material). This pump is fully Indian made and is strong enough for any heavy duty use.

### Application

-  Water Transfer
-  Irrigation
-  Water Tankers
-  Fire Protection
-  Industrial
